

AKSHAY MUNDRA

Software Developer | Python | React | AI/ML Enthusiast
9166678361 | akshaymundra07@gmail.com | Jaipur, Rajasthan
[Portfolio](#) | [GitHub](#) | [LinkedIn](#) |

PROFESSIONAL SUMMARY

Motivated Computer Science undergraduate (B.Tech CSE, Poornima College of Engineering, 2024–2028) with hands-on experience in Python development, full-stack web applications, and AI-powered solutions. Built and shipped 4+ independent projects spanning React/TypeScript, Java, and Python, integrating AI and geolocation APIs. Finalist at IIT Bombay's AI Eduthon Hackathon and nominee for Smart India Hackathon 2025. Passionate about building scalable, impactful software under tight deadlines.

EDUCATION

Bachelor of Technology – Computer Science & Engineering, Poornima College of Engineering, Jaipur 2024 – 2028

TECHNICAL SKILLS

Languages: Python, Java, C++, SQL, Kotlin, Flutter

Frameworks & Libraries: React.js, TypeScript, Pandas, NumPy, Matplotlib, Seaborn

Tools & Platforms: Git/GitHub, VS Code, Android Studio, MySQL, Vite, Gemini API, Google Maps API

PROFESSIONAL EXPERIENCE

Python Developer Intern — Renao Robotics Pvt. Ltd., Jaipur

Jun 2025

- Engineered Python-based automation solutions using core language concepts, libraries, and frameworks to solve real-world business problems.
- Built a Multiple ID Generator application (Python, Pillow) that produces personal and government-style ID card images from a single input, improving process efficiency.

PROJECTS

EduBridge — Offline AI Learning Platform for Rural Students

Nov 2025 – Dec 2025

Tech Stack: React.js, TypeScript, Vite, Gemini API

- Architected a fully interactive web app with 10+ modular UI components and responsive multi-device design for low-connectivity rural environments.
- Integrated Google Gemini API to deliver personalized, AI-driven learning assistance and improve student engagement.
- Implemented offline-first design patterns to ensure functionality without persistent internet access.

BlockTrip — Smart Tourist Safety Monitoring System

Sep 2025

Tech Stack: Python, Google Maps API

- Built a real-time tourist safety platform that tracks traveler locations and surfaces safety insights, addressing a critical gap in travel infrastructure.
- Integrated Google Maps API for live location tracking and dynamic route visualization, enabling efficient navigation and emergency response.
- Nominated for Smart India Hackathon 2025 (National Level) for project impact and technical merit.

CERTIFICATIONS

Google Gemini Certified Student — Google for Education

Dec 2025

Generative AI Workshop – RAG, AI Agents and Agentic AI — GUVI | HCL

Apr 2026

Python Developer Internship Certificate — Renao Robotics Pvt. Ltd.

Jun 2025

Basics of Data Structures and Algorithms — Certificate Code: 9458405

Nov 2025

ACHIEVEMENTS & COMPETITIONS

- AI Eduthon Hackathon Finalist — Techfest, IIT Bombay: Selected as a finalist among teams from institutions across India in one of the country's premier AI-focused competitions.
- Smart India Hackathon 2025 Nominee (National Level): Nominated with the BlockTrip project — a Python and Google Maps API-based smart tourist safety monitoring system.
